EDUCATION

De La Salle University Manila

BS Computer Science, Major in Software Technology

Manila, Philippines

2024 – Present

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL

Frameworks & Libraries: React, Node.js, Express, Tailwind CSS, Prisma ORM

Databases: PostgreSQL, MongoDB, MySQL

Tools & Platforms: Git, Linux, Vim, VS Code, Supabase, Render

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Discrete Mathematics, Database Systems, Software Engineering.

EXPERIENCE

Full-Stack Developer (Freelance)

April – May 2026

Hair Salon Inventory System

Remote

- Built a production-grade salon management system (inventory, delivery, transactions) using Node.js, Express, Prisma ORM, and PostgreSQL hosted on Supabase
- Implemented real-time stock tracking, low-stock alerting, and audit logging to support daily salon operations
- Developed JWT-based authentication with role-based access control (Admin/Staff) and a responsive React (Vite) + Tailwind CSS frontend
- Deployed backend on Render with connection pooling, environment-based configuration, and a Git-based release workflow

Relations Executive

Oct. 2025 – Present

Google Developer Groups on Campus, De La Salle University

Manila, Philippines

- Managed external partnerships with student organizations and technical communities, coordinating event collaborations and sponsorship engagements
- Led outreach communications to university and non-university organizations for event invitations and partnership opportunities

Officer, Internals Committee

Oct. 2025 – Present

DLSU Futsal Club, De La Salle University

Manila, Philippines

- Coordinated logistics for training sessions, team-building events, and social activities for 200+ members
- Maintained internal records and communication workflows to improve organizational efficiency and planning

PROJECTS

Zendo (Minimalist To-Do App) | *MongoDB, Express, React, Node.js, Tailwind CSS* github.com/jdsia/Zendo

- Developed a full-stack MERN application with JWT authentication, bcrypt password hashing, and cookie-based session management
- Built drag-and-drop task interactions and a responsive UI, backed by a RESTful API with MongoDB for document-based storage

Flood Control Data Analysis Pipeline | *JavaScript, CSV Processing* github.com/jdsia/CSADPRG-MCO2

- Built a JavaScript data pipeline to process DPWH flood control datasets, performing preprocessing, aggregation, and infrastructure financial reporting

Arrows Shuttle Reservation System | *C, File I/O* github.com/jdsia/CCPROG2-MP

- Implemented a file-persistent reservation system in C with structured data handling, booking logic, and slot allocation record management
