EDUCATION

De La Salle University Manila

BS Computer Science Major in Software Technology

Manila City

2024 – Present

EXPERIENCE

Full-Stack Developer (Freelance)

April – May 2026

Hair Salon Inventory System (Client: Local Business)

Remote

- Architected and delivered a production full-stack inventory management system supporting daily operations for a small business salon
- Designed RESTful backend APIs using Node.js, Express, and Prisma ORM with PostgreSQL, ensuring transactional consistency across inventory operations
- Migrated database infrastructure to Supabase and resolved production connectivity constraints, implementing connection pooling for stability and scalability
- Deployed backend services on Render with environment-based configuration and monitoring, achieving reliable cloud-hosted API availability
- Implemented real-time inventory system with automated stock tracking, low-stock alerting, and audit logging for operational transparency
- Built secure authentication system with JWT-based sessions and role-based access control (Admin/Staff) for protected operational workflows
- Developed responsive React (Vite) frontend with Tailwind CSS and integrated cloud API through production proxy configuration
- Established Git-based deployment workflow with environment separation supporting staged production releases

Relations Executive

Oct. 2025 – Present

Google Developer Groups on Campus, De La Salle University

Manila, Philippines

- Managed partnerships and external relations with student organizations and technical communities within the university ecosystem, coordinating event collaborations and sponsorship-related engagements
- Initiated and handled external outreach communications with university and non-university organizations for event invitations and partnership opportunities

Officer, Internals Committee

Oct. 2025 – Present

DLSU Futsal Club, De La Salle University

Manila, Philippines

- Coordinated logistics and execution of internal club operations including training sessions, team-building events, and social activities
- Managed attendance tracking and internal records for 200+ members to support planning and operational decision-making
- Facilitated internal communication workflows to improve organizational efficiency and event coordination

PROJECTS

Zendo (Minimalist To-Do App) | *MongoDB, Express, React, Node.js, Tailwind*

Github

- Developed a MERN stack application focused on clean UX and efficient task management
- Implemented JWT authentication, bcrypt hashing, and cookie-based session handling
- Built drag-and-drop task interactions and responsive UI with Tailwind CSS
- Designed RESTful backend with MongoDB for scalable document-based storage

Flood Control Data Analysis Pipeline | *JavaScript, CSV Processing*

Github

- Processed DPWH flood control datasets using JavaScript-based data pipelines
- Implemented preprocessing, aggregation, and reporting for infrastructure and financial analysis

Arrows Shuttle Reservation System | *C, File I/O*

Github

- Developed a reservation system using structured data handling and file persistence
- Implemented booking logic and record management for efficient slot allocation

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL

Web: React, Node.js, Express, HTML, CSS, Tailwind

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, Linux, Vim, VS Code

Coursework: Data Structures & Algorithms, OOP, Discrete Mathematics, Database Systems
