EDUCATION

De La Salle University Manila

BS Computer Science, Software Technology

Manila City

2024 – Present

EXPERIENCE

Officer, Internals Committee

DLSU Futsal Club, De La Salle University

Oct. 2025 – Present

Manila, Philippines

- Coordinated logistics and planning for internal club events including team-building events, social gatherings, and training sessions
- Maintained and tracked attendance records for 200+ club members to support event planning and internal coordination
- Oversee internal operations to ensure smooth communication and administrative efficiency within the club

Relations Executive

Google Developer Groups on Campus, De La Salle University

Oct. 2025 – Present

Manila, Philippines

- Handled partnerships and relations with both External and Internal Organizations of the Google Developer Groups on Campus - De La Salle University

PROJECTS

Hair Salon Inventory System (Alpha 8) | *Node.js, Express, TypeScript, PostgreSQL, Prisma, React, Tailwind*

- Architected a full-stack inventory platform for a salon business handling hundreds of monthly customers
- Designed RESTful APIs with Express and Prisma ORM, leveraging PostgreSQL transactions for consistency
- Implemented real-time stock computation from transactional data (inbound, outbound, usage)
- Built JWT-based authentication with role-based authorization (Admin/Staff)
- Developed audit logging and low-stock alert mechanisms for operational visibility
- Created a responsive React + Vite frontend to streamline staff workflows

Zendo (Minimalist To-Do App) | *MongoDB, Express, React, Node.js, Tailwind*

Github

- Developed a MERN stack application with focus on clean UX and efficient task management
- Implemented JWT authentication, bcrypt hashing, and cookie-based session handling
- Built drag-and-drop task interactions and responsive UI with Tailwind CSS
- Designed RESTful backend with MongoDB for scalable document-based storage

Flood Control Data Analysis Pipeline | *JavaScript, CSV Processing*

Github

- Processed DPWH flood control datasets using JavaScript-based data pipelines
- Implemented preprocessing, aggregation, and reporting for infrastructure and financial analysis

Arrows Shuttle Reservation System | *C, File I/O*

Github

- Developed a reservation system using structured data handling and file persistence
- Implemented booking logic and record management for efficient slot allocation

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL

Web: React, Node.js, Express, HTML, CSS, Tailwind

Databases: PostgreSQL, MongoDB, MySQL

Tools: Git, Linux, Vim, VS Code

Coursework: Data Structures & Algorithms, OOP, Discrete Mathematics, Database Systems
